DETAILED ACTION

Applicant canceled **Claims 11-14** via Preliminary Amendment, filed 28 Jun. 2005.

Claims 1-10 and **15-19** are pending and subject to a Restriction Requirement.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

Lack of Unity Requirement

A restriction is required according to the provision of PCT Rule 13.2, since **Claims 1-12** and **17-21** are drawn to more than one inventive concept (as defined by PCT Rule 13). PCT Rule 13.1 states that the international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept (requirement of unity of invention). Further, PCT Rule 13.2 states unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a “technical relationship” among those inventions involving one or more of the same or corresponding special technical features.

Annex B, Part 1 (b), provides that “special technical features” mean those technical features, which, as a whole, define a contribution over the prior art.

This application contains inventions not so linked as to form a single general inventive concept under PCT Rule 13.1.

The following groups are exemplary:

- **Group I:** **Claims 1-6, 10, 15, and 16** are drawn to compounds, compositions, and a method of treatment using the compounds of formula I.
- **Group II:** **Claims 7 and 10** are drawn to a compounds of formula II.

Art Unit: 1626

- **Group III:** **Claims 8 and 10** are drawn to compounds of formula III or IV.
- **Group IV:** **Claims 9 and 10** are drawn to compounds of formula V.
- **Group V:** **Claim 17** is drawn to a process for preparing compound of formula X.
- **Group V:** **Claim 18** is drawn to a process for preparing compound of formula XIII.
- **Group XV:** **Claim 19** is drawn to a process for preparing compound of formula XIII.

In accordance with 37 CFR 1.499, Applicant is required, in reply to this action, to elect a single invention to which these claims must be restricted. This listing of Groups is not exhaustive, as it would be impossible to produce such a list under the time constraints due to the large volume of subject matter claimed in this application.

There is no structural moiety common throughout **Claims 1-10 and 15-19**. Therefore, there is also no special technical feature. Each Group listed is drawn to a different generic structure, none of which anticipate or render the other Groups obvious.

Claims 1-10 and 15-19, then, are not so linked as to form a single general inventive concept, and there is a lack of unity of invention. The variables vary extensively and when taken as a whole result in vastly different compounds. Additionally, the vastness and complications of the claimed subject matter impose a serious burden on any examination of the claimed subject matter.

Because the claims do not relate to a single general inventive concept under PCT Rule 13.1 and lack the same or corresponding special technical features, the claims lack unity of invention and should be limited to a product, a process for the manufacture of said product, or a method of use.

Art Unit: 1626

After making an election, Applicant is reminded to withdraw all of the nonelected subject matter. Indication of the withdrawal in the Claims should reflect the proper status identifiers.
